SIT *v.* (etym. note and A. 5 a α note). For cases of mere substitution of forms of *sit* for forms of *set*, see A. 1 γ, 2 ζ below. B. Signification.

General arrangement of senses. I. To cause to sit, seat; to be seated, sit. II. To sink, descend. III. To put in a definite place (the manner of the action being implied either in the verb itself or in the context). IV. To place or cause to be in a position, condition, relation, or connexion. (This group embraces a large number of uses in which the precise implication of sense depends mainly on the kind of construction employed.) V. To appoint, prescribe, ordain, establish. VI. To arrange, fix, adjust. VII. To place mentally, suppose, estimate. VIII. To put or come into a settled position or condition. IX. To put in the way of following a course, cause to take a certain direction. X. Senses perhaps arising from reversal of construction or from ellipsis (their origin being often obscure). XI. With prepositions in specialized senses. XII. With adverbs in specialized senses. (Combinations formed on the verb-stem are given in a separate article, SET-.) ☞ A phrase key is given on page 548.

I. To cause to sit, seat; to be seated, sit.

The intransitive sense 'to sit' (5) was apparently developed out of the reflexive and passive uses of the original transitive sense of 'to seat'. *Set*, being thus used synonymously with *sit*, became capable of taking its other senses and constructions (see 5 d, e, 6, 7).

1. *trans.* To place in a sitting posture; to cause to occupy a seat; to seat.

This sense is barely exemplified outside certain phraseological expressions, e.g. *to set on a seat, a throne, on horseback*, etc., in which the sense 'cause to sit' is now lost sight of. (Prov. *to set a beggar on horseback*: to give an undeserving person an advantage which he will misuse.)

Technically, 'sewer' is distinguished from 'drain', the latter being restricted to channels used 'for the Drainage of one Building only or Premises within the same Curtilage' (Act. 11 & 12 Vict. c. 112 § 147).

The term 'Commission of Sewers' (AF. *Commission de Sewerez, de Sewers*) occurs first in 1427 (Rolls of Parlt. IV. 333/1 and Act 6 Hen. V, c. 5), but the issue of similar commissions is recorded in 1314 (Rolls of Parlt. I. 319/1) and in 1322 (Placit. Abbrev. 339/1).

[*Note.*—In the collocations 'Commission of sewers', 'works of sewers', etc., the word had virtually a much wider meaning than sense 1 above; it practically denotes any means of defence against inundation from the sea. The formula enumerating the things placed under the control of the commissioners begins with 'walls' (1322 more fully 'sea-walls', *murorum maritimorum*) and mentions 'sewers' only in the fifth or sixth place. This had already attracted the attention of lawyers early in the 17th c.; in 1622 Callis (*Stat. Sewers*, ed. 1647, p. 57) states that 'some compound the word of *sea* and *were*' (=Weir, defence). Although sense 1 is certainly genuine, and the etymology stated at the head of this article is well established, it seems not impossible that there may have been some early confusion with a native compound of the formation suggested by the writers referred to by Callis. No instance of OE. **sæwer*, however, is known; a (? plural) *sæ-wærre*, of obscure meaning, occurs A.D. 1045 (Kemble *Cod. Dipl.* No. 776): 'Se igzað æt portes bricge & healfe sæ-wære & se mylnstede æt Mannæs bricge.' The Anglo-Latin derived verb *seuerare* (1314 in *Rolls of Parlt.* I. 319/1) appears to mean 'to protect from flood'.

The pseudo-etymological spelling *seward* (quot. 1623 in 3) is noteworthy. Skinner (Etymol. 1671, s. v.) erroneously attributes to Minsheu the statement that the word 'was formerly written *seward*, perhaps from *seavard*, either because they [*sc.* sewers] are made towards the sea, or because they ward off the sea'.]

1730 BAILEY (fol.), *Sgrafit*, a method of Painting in black and white only, not in *fresco*. 1847 *Manual of Oil-Painting* 126 *Sgraffito.* A kind of bold design, in black and white, done by scratching a wall where it was purposely painted of the former hue. 1847 EASTLAKE *Mater. SH, a consonantal digraph representing the simple sound (ʃ). In late OE. this sound was represented by the combination *sc*, which retained its original phonetic value (sk) only in words of foreign origin. The sound (ʃ) did not exist in early OF., and hence the early ME. texts, written by French-educated scribes, show great diversity of attempts to find expression for it. The OE. notation by *sc* became rare after the 12th c. Some scribes of the 12–13th c. used the single *s* initially and finally. More frequent was *ss* (used in all positions), which is found as late as 1340 (*Ayenbite*). In medial and final positions *ssh* was common from the 13th to the 16th c.; Coverdale (1535) has frequently *szsh*, sometimes *szh* (but also often *sh*). The prevailing form from the end of the 12th c. to the end of the 14th c. was *sch* (initially; in other positions it was less frequent); in the north it was common down to the end of the 16th c. In the 13th c. we occasionally find *sge, sʒe, sue* for *she* (rarely *sȝ* or *sz* in other words), and in the 14–15th c. some East Anglian scribes wrote *xal, xulde* for *shall, should*. In ME. texts the suffix *-ship* is often written *-chipe*, and sometimes *ch* occurs as the symbol of (ʃ) in other positions.

The combination *sh* (probably to be regarded as a simplification of *sch*) is regularly used in the *Ormulum* *c* 1200 and frequently in the *Trinity College Homilies* of about the same date. It is the usual symbol in the London documents of the 14th c. and in the MSS. of Chaucer, and from the time of Caxton onwards it has been the established notation for (ʃ) in all words except those which (as *machine, schedule, Asia*, the derivatives in *-tion*, etc.) are spelt unphonetically on etymological grounds.

In some compounds as *dishonest, mishap, Gateshead, s* and *h* come together without forming a digraph. The pronunciation of some proper names in which this sequence occurs has been affected by misinterpretation of the spelling; e.g. Evesham is often called (ī·vʃăm), Petersham (pī·tɔɪʃăm).

Sh (ʃ), *int.* Also written 'sh (as if an abbrev. of *hush*). An exclamation used to enjoin silence or noiselessness; = HUSH *int.* The reduplication or prolongation of the sound is indicated by *sh-sh, s-s-sh*, and the like (see quots.).

1847 *Man in the Moon* II. 114 He..imposed silence by a long-drawn S-s-s-s-s-s-sh! 1848 THACKERAY *Van. b. *Shadow of death*: a Biblical expression (= LXX and N.T. *σκιὰ θανάτου*, Vulg. *umbra mortis*) embodying an ancient interpretation of Heb. צלמות, traditionally vocalized *ṣalmā·veth*, as if f. *ṣēl* shadow + *mā·veth* death.

Ewald and many other scholars, however, think the word should be pronounced *ṣalmūth* (or as pl. *ṣĕlāmōth* = Arab. *ṣalamāt*), and that it comes from the Semitic root found in Arab. as ظلم *ẓalima* to be dark. However this may be, it is in the Old Testament merely a poetic word for intense darkness (so the margin of the Revised Version, 'deep darkness'). But the phrase 'shadow of death' has (in Eng. as in Christian Latin and other langs.) often been used with various meanings naturally suggested by the words; the commonest use is to denote the gloom and horror of approaching dissolution.

The valley of the shadow of death (Ps. xxiii. 4 in Eng. versions from Coverdale 1535; the earlier versions follow the Vulg. and LXX, which read 'midst' instead of 'valley'): often applied to the experience of being brought by illness apparently near to the grave.

The Land of the Shadow of Death: a rhetorical name for a tract of Western Africa in which the mortality among the white inhabitants is very great.

LG. *schacht* (also Du.) of the same meaning, usually regarded as a specific application of *schacht* = SHAFT *sb.*2, the primitive notion being that of something cylindrical. It is possible, however, that the type **skafto-* represented by LG. *schacht*, Eng. *shaft* 'pit-hole', may be a separate formation on the Teut. root **skab-* of SHAVE *v.*, in its original sense to dig (cf. Gr. σκάπτειν). On either of these views, it is doubtful whether *shaft* 'pit-hole' goes back to OE. (though not recorded before the 15th c.), or was introduced into England by foreign miners.

Some scholars still adhere to the view of Grimm, that the HG. *schacht* (and LG. *schacht* in this sense) represent a Teut. type **skaχto-z*. On this supposition the Eng. word would necessarily be a loan word from the continent. Grimm's hypothesis is formally possible, but leaves the ultimate etymology obscure, as the suggested connexion with the root **skab-* SHAKE *v* is semasiologically improbable.]

Shall (ʃæl), *sb.* [f. SHALL *v.*]

1. An utterance of the word 'shall'; a command, promise, or determination (such as is expressed by means of 'shall').

It is doubtful whether quots. 1553 and 1608 belong to this word or to SHALE *sb.*[1] Quots. 1566 and 1593 imply the existence of a punning phrase *to feed* or *serve with shalls* (*shales*).

The Teut. root (**skel-*:) **skal-* : **skul-* to owe (:—pre-Teut. **skel-* : **skol-* : **skˈl*) is represented by Goth. *skula*, OHG., OS. *scolo*, OE. *gescolu* wk. masc., debtor, OHG. *sculd*, *sculda* (mod.G. *schuld*), OS. *sculd*, OE. *scyld* fem., debt, guilt. Outside Teut. the only certain cognates are Lith. *skelěti* to be guilty, *skìlti* to get into debt, *skolà* debt, guilt, OPrussian *skallisnan* (acc.) duty, *skellânts* guilty, *po-skulit* to admonish.

The northern English dialects (including Sc.) have a form *sal*, pa. t. *suld*, with initial *s* instead of *sh*. This does not occur in the remains of ONorthumbrian, but first appears in the 13th c. It is remarkable that a similar form, with *s* irregularly representing OTeut. *sk*, existed as a dialectal variant in OHG. (*sal*, *sol*, *sulun*) and OFris. (*sal*, *sel*), and has ousted the regular form in Ger. (*soll*, *sollen*) and Du. (*zal*, *zoû*). Some scholars regard the *s* form as representing an OTeut. variant, originating from the euphonic dropping of *k* in inflexional forms like the subjunctive **skli-*. It seems more probable that it was independently developed in the different dialects at an early period, while the *sk-* retained its original pronunciation; in stressless position the *k* might naturally be dropped, and the simplified initial afterwards extended by analogy to the stressed use.

In Eng. the vb. has no inf. or pples. (the evidence of an OE. inf. *sculan*, *sceolan*, is doubtful). Some of the other Teut. langs. have an infinitive: OHG. *scolan*, *solan* (MHG., mod.G. *sollen*), MDu. *sullen* (Du. *zullen*), ON. *skulu* (pa. t. inf. *skyldu*); Goth. has the pres. pple. *skulands* and the pa. pple. *skuld-s*; OHG. has the pres. pple. *scolanti* (mod.G. *sollend*), and early mod G. the pa. pple. *gesollt*; ON. has a ppl. adj. *skyld-r* bound by duty.]

8. As a mere auxiliary, forming (with present infinitive) the future, and (with perfect infinitive) the future perfect tense.

In OE. the notion of the future tense was ordinarily expressed by the present tense. To prevent ambiguity, *wile* (will) was not unfrequently used as a future auxiliary, sometimes retaining no trace of its original sense. On the other hand, *sceal* (shall) even when rendering a Latin future, can hardly be said to have been ever a mere tense-sign in OE.; it always expressed something of its original notion of obligation or necessity. In ME. the present early ceased to be commonly employed in futural sense, and the future was expressed by either *shall* or *will*, the former being much more common. The usage as to the choice between the two auxiliaries has varied from time to time; since the middle of the 17th c. the general rule (subject to various exceptions) has been that mere futurity is expressed in the first person by *shall*, in the second and third by *will*. In indirectly reported speech, usage permits either the retention of the auxiliary used by the original speaker or the substitution of that which is appropriate to the point of view of the person reporting.

a. In OE. *sceal*, while retaining its primary sense, served as a tense-sign in announcing a future event as fated or divinely decreed. Hence *shall* has

always been the auxiliary used, in all persons, for prophetic or oracular announcements of the future, and for solemn assertions of the certainty of a future event.

b. In the first person, *shall* has, from the early ME. period, been the normal auxiliary for expressing mere futurity, without any adventitious notion. (*a*) Of events conceived as independent of the speaker's volition. (To use *will* in these cases is now a mark of Scottish, Irish, provincial, or extra-British idiom.)

(*b*) Of voluntary action or its intended result. Here *I* (*we*) *shall* is always admissible exc. where the notion of a present (as distinguished from a previous) decision or consent is to be expressed (in which case *will* must be used). Further, *I shall* often expresses a determination insisted on in spite of opposition, and *I shall not* (colloq. *I shan't*) a peremptory refusal.

In the 16th c. and earlier, *I shall* often occurs where *I will* would now be used.

c. In the second person, *shall* as a mere future auxiliary appears never to have been usual in affirmative or negative senses (exc. in the uses treated under 9 a and 11); but in categorical questions it is normal: e. g. '*Shall* you miss your train? I am afraid you will.'

d. In the third person. *Obs.* (superseded by *will*) exc. when another's statement or expectation respecting himself is reported in the third person,-e. g. 'He says he shall not have time to write.' (Even in this case *will* is still not uncommon, but in some contexts leads to ambiguity; it is therefore preferable to use *he shall* as the indirect rendering of *I shall*.)

¶ e. Down to the 18th c., *shall*, the auxiliary appropriate to the first person, was sometimes used when a person wrote of himself in the third person.

9. In the idiomatic use of the future to denote what ordinarily or occasionally occurs under specified conditions, *shall* was formerly the usual auxiliary. In the second and third persons, this is now somewhat formal or rhetorical; ordinary language substitutes *will* or *may*. Often in antithetic statements coupled by an adversative conjunction or by *and* with adversative force.

10. In hypothetical, relative, and temporal clauses denoting a future contingency, the future auxiliary is *shall* for all persons alike. (Where no ambiguity results, however, the present tense is commonly used for the future, and the perfect for the future-perfect; the use of *shall*, when not required for clearness, is apt to sound pedantic.)

† Formerly sometimes used to express the sense of a present subjunctive.

15. Forming with the inf. a substitute for the pa. t. indic. (The perf. inf. was often substituted for the pres. inf. merely in order to express the notion of past time more unambiguously. *Obs.* exc. *dial.*

The corresponding use of *shall* (= G. *soll*, 'is said to') is not evidenced in Eng., the OE. instances alleged by Bosw.-Toller having apparently a different meaning.

*** *The past tense* should *with modal function.*

As with other auxiliaries, the pa. t. (orig. subjunctive) of *shall* is often used to express, not a reference to past time, but a modal qualification of the notion expressed by the present tense. Where in addition the notion of past time is to be expressed, this can often be effected by the use of the perf. instead of the pres. inf. (though sometimes this produces ambiguity); the temporal notion may however be merely contextually implied, and in that case the pa. t. has the appearance of having both functions (temporal and modal) at once.

18. In statements of duty, obligation, or propriety (originally, as applicable to hypothetical conditions not regarded as real).

This conditional form of expression was from an early period substituted for the unconditional *shall* in sense 2, and in mod. Eng. the pres. tense in this use is obs., and *should* = ought to.

interrogatively. 1834 K. H. DIGBY *Mores Cath.* v. iii. 84 But where should one finish if one were to speak of the 'lauda Sion' [etc.].

b. When the pres. tense of the principal vb. would be used if the hypothesis were accepted. (Where the pa. t. or the perf. would be used, *should* is followed by the perf. inf.)

In this use the combination of *should* with inf. forms a periphrastic past subjunctive: thus 'I should be' = the archaic 'I were'. Similarly with perf. inf.: 'Then I should have been' = 'then had I been'.

The choice between *should* and *would* follows the same rules as that between *shall* and *will* as future auxiliaries, except that *should* must sometimes be avoided on account of liability to be misinterpreted as = 'ought to' (sense 18). In present Eng. *should* occurs mainly in the first person; in the other persons it follows the rule for *shall* in 8c, d.

¶ with omission of *have* in perf. inf.

1585 NORDEN *Sinful Mans Solace* 25 b, Then should not thus my silly soule Bene wrapt in irkesome woe.

c. With verbs of liking, preference, etc., *should* in the first person (and interrogatively in the second) is regarded as more correct than *would*, though this is often used.

In the third person *should* is used only in indirect speech (when *he* represents *I*); uses like quot. 1862 are abnormal.

The forms *I should have liked to* (*see*) and *I should like to have* (*seen*) are alternative ways of adding the temporal notion to the modal sense of *should*. Another form, sometimes met with, but certainly faulty, is *I should have liked to have* (*seen*).

1779 BOSWELL *Johnson* (1901) II. 308 Should you not like to see Dublin, Sir? 1785 TRUSLER *Mod. Times* III. 81 Should you like any thing up stairs, or would you prefer it in the kitchen? 1838 MACAULAY *Ess., Sir W. erroneous use. 1883 L. OLIPHANT *Altiora Peto* I. 8, I should much preferred to have seen you there.

d. The original conditional notion is obscured in the phrases *It should seem* (see SEEM *v.* 7 f); *one should think* (now somewhat *arch.* and perh. sometimes interpreted in the sense of 18). Similarly *I should think* (*suppose*, etc.) = 'I am inclined to think (suppose, etc.)'; also *colloq.* as a strong affirmation in reply to a tentative suggestion, e. g. 'I should (rather) think he *did* object'.

In the last phrase (as used idiomatically), *would* is never substituted; in the second person the phrase is used only in questions, and in the third person only in oblique narration.

21. In a hypothetical clause relating to the future, *should* takes the place of *shall* (indicative or subjunctive), or of the equivalent use of the present tense, when the supposition, though entertained as possible, is viewed as less likely or less welcome than some alternative. 22. In a noun-clause (normally introduced by *that*).

a. In dependence on expressions of will, desire, command, advice, request.

Where the verb of the governing clause is in the pa. t., this use is indistinguishable from that treated in 14 d.

The substitution of *should* for the earlier *shall* (itself a periphrastic substitute for the more primitive use of the pres. subjunctive: see 21 a) may have arisen from instances in which the governing vb. was in the modal pa. t. (as in quots. *c* 1200, 1340).

Shape (ʃēp), *v.* Pa. t. **shaped** (ʃēpt); pa. pple. **shaped** (ʃēpt), *arch.* **shapen** (ʃē·p'n). [A Com. Teut. str. verb, the original conjugation of which is found unaltered only in OE., OFris., OS., and Gothic, while in the other Teut. langs., and in Middle and Modern English, the primitive flexional forms have been more or less completely replaced by analogical new formations. OE. *scieppan, scōp, scapen* corresponds to OFris. **skeppa, skōp, eskepen* (WFris. *skeppe, skoep, skepen*), OS. **gisceppian, -scōp* (*scuop*), **-scapan*, Goth. *gaskapjan, -skōp, -skapans*: the sense in all these langs. is 'to create', occas. 'to fashion'. In early ME. a new pres.-stem *shape* was formed on the analogy of the pa. pple., and after the 14th c. completely took the place of the older *sheppe, shippe*. The str. pa. t. survived into the 14th c. (in Sc. still later), but in ME. two different weak formations are also found: *shupte* (ü) from the original present-stem, and *shapide* from the altered form *shape*. In the pa. pple. ME. similarly developed two distinct weak forms, of the types *schept* and *shaped*. From the 16th c. onwards, *shape* has been a 'regular' weak verb (pa. t. and pa. pple. *shaped*), though the pa. pple. *shapen* still survives in archaizing use. The verb has been influenced in sense-development by SHAPE *sb.*, of which it is apprehended as a derivative.

In continental Teut. the changes in conjugation were similar to those that took place in ME.; in addition, a cognate verb repr. an OTeut. type **skapōjan* became in some dialects coincident in form with the verb represented by the OE. and Gothic forms above. Further, German and Du. have from their earliest known periods had a verb meaning 'to draw water', identical in form (and perhaps in etymology) with the verb meaning 'to create'; in the older stages of those langs. all the conjugational varieties occur with both meanings, but subsequently the verb meaning 'to create' and that meaning 'to draw water' came to be distinguished throughout by difference of inflexion. The forms are as follows:—OFris. **skeppa, skōp, eskepen* to create, OS. *giscōp* pa. t., created, *skeppian* wk., to draw water; Du. *scheppen, schiep, geschapen* to create, *scheppen, scheple, geschept* to draw water; OHG. *scephen, scuof, giscaffan*, also *scaffan, scafta, gascheft* to create, to draw water, also *scaffōn* wk., to form; MHG. *schepfen, schepfte, geschepft*, also *schaffen, schuof, geschaffen*, and occas. *schaffen, schaffte, geschafft* to create, to do, to draw water; mod.G. *schopfen, schopfte, geschopft* to draw water, earlier also to create (cf. *schöpfer* creator); *schaffen, schuf, geschaffen* to create; *schaffen, schaffte, geschafft* to do, procure; ON. *skepja, skōp* and *skapða, skapt-r*, also *skapa, skapaða, skapað-r* to shape, make, ordain; Sw. *skapa*, Da. *skabe* to create, make, shape.

The ultimate etymology is obscure. Some scholars have suggested that the original sense is 'to draw (water) from a source', and that the senses 'to create', 'to ordain' are developed from this. Others regard **skapjan* to draw water (which is related to OTeut. **skapa-*, OS. *scap*, OHG. *scaf*, mod.G. *schaff*, vessel, bucket) as a distinct word from **skapjan* to create, ordain. For other derivatives of the Teut. root **skap-* see SHAFT *sb.*[1], -SHIP; outside Teut. no cognates are known, unless the root **skap-* be an altered form of **skab-* (←pre-Teut. **skabh-*): see SHAVE *v.*]

I. To create, fashion, form.

†1. *trans.* To create; in later use, to form, fashion (said of God or Nature).

From the beginning of the 14th c. there are indications that the verb in this use was sometimes apprehended as meaning 'to form, fashion, give shape to', and in the 16th c. the verb, though still used of God, would prob. have been regarded as corresponding to *formare*. In the 17th c. it was felt to be an inappropriate word to apply to God: cf. 'God makes, and the Tailor shapes' (Bulwer *Anthropom.* 256).

†**Shark,** *sb.*[2] *Obs.* Also sharke. Cf. SHIRK *sb.* [Of uncertain etymology.

It is noteworthy that SHIRK occurs with the same meaning frequently from 1639 down to the beginning of the 18th c., and that the G. *schurke* (now in wider sense, scoundrel, villain) had in the 16th c. precisely the same sense. Words with meanings of this character were *c* 1600 often adopted from Ger., and it is not unlikely that this word represents an adoption of G. *schurke* (earlier *schunk, schorch*), assimilated in form to SHARK *sb.*[1], of which it seems often to have been felt as a figurative use.]

A worthless and impecunious person who gains a precarious living by sponging on others, by executing disreputable commissions, cheating at play, and petty swindling; a parasite; a sharper. In later use influenced by SHARK *sb.*[1] 2.

Shark (ʃāːk), *v.*1 Also 7 **sharke**; and see SHIRK *v.* [Of uncertain origin.

It seems likely that two different words have been more or less confused from the time of the earliest examples: the one (which has the variants *sherke*, *shirk(e*: see SHIRK *v.*)

SHARK *sb.*2, and the other f. SHARK *sb.*1 The senses naturally resulting from these derivations respectively are so nearly allied, and the use with mixed notions is so frequent, that the two verbs cannot be distinguished.

Skeat conjectured that *shark* vb.1 (which he regarded as the source, not the derivative, of the two sbs.) was a. north-eastern Fr. *chercurer* = F. *chercher* to seek, orig. to go about to find. He refers to the phrase '*cercher le broust*, to hunt after feasts, to play the parasite or smell-feast' (Cotgr.), and to the similar It. '*cercare del pane*, to shift for how to live' (Torriano). In view of the senses of this verb and those of SHARK *sb.*2 (parasite, one who lives by shifts), the citation of these phrases gives striking plausibility to Skeat's hypothesis, which would also account for the divergent forms *shark*, *sherk*, *shirk*. But the sense in which the Fr. verb is assumed to have been adopted is merely contextual in the phrase quoted; further, the importation of the Fr. word in a dialectal form at the end of the 16th c. would be surprising, and if (which is unlikely) the adoption took place early the initial sound would normally be *ch*, not *sh*.]
